

techUK's 10 Point Plan for Healthtech

Our recommendations
to improve the health
tech landscape

14th May 2021

Who are we? - a selection of our members

What we do: Programme overview

We engage at all levels of seniority with the NHS and private sector in England, Scotland, Wales and with the Health and Social Care service in Northern Ireland.

Engagement and collaboration with the NHS arms-length bodies

We undertake prioritisation work with NHSX, including facilitating market engagement and procurement pipeline oversight. We maintain a Strategic Partnership with NHS Digital and are developing a similar agreement with NHSX. Throughout the year we offer opportunities for members to feed into our policy advocacy work through consultation events, policy papers and briefings with senior NHS leaders.

Navigating NHS frameworks

We support members through our Supplier Development Programme for the NHSE HSS Framework

Our core workstreams for 2021:

- Standards and Interoperability
- Social Care
- Commercial and Procurement
- Regulatory environment and policy reform (draft Health and Care Bill)
- Skills and Diversity
- User Centered Design

Who am I?

- techUK Programme Manager (soon to join NHSX as the Engagement Lead for Standards and Interoperability)
- Manage the interoperability, user centred design and social care working groups
- Professional Record Standards Body
Advisory Board member

Ten Point Plan

10 Recommendations

5 Chapters (Digital Citizens, Interoperability, Social Care, Workforce and Procurement)
