

Unlocking the legacy with Hybrid Cloud in health and social care

Digital Health and Social Care

June 26th 2020

Andrew Puddephatt
Director - Public Sector

Healthcare Providers - Landscape & Challenges

What we've digitized in the past decades

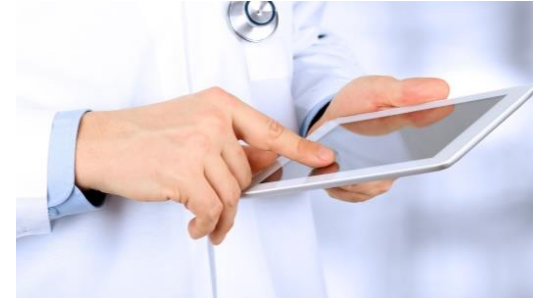

HIS Integration and Lifecycle Management

EMR / PACS / VNA
Admin, Billing, 100-500+ Apps
Interfaces
SLAs
Upgrades / Patches

BioMedical Data Deluge

DICOM & Non DICOM
Digital Pathology
Genomics
IoT

Patient Engagement and Population Health Management

Patient Portals & Social Media
Security and Compliance concerns
Primary/Secondary Care
Collaboration

Translational Research aaS

Clinical & Operational Analytics
Clinical Data Repository
Research aaS
Shadow IT elimination

Limited Resource Staff

Constrained Budgets

Evolving Context – Regulations, Geography, M&A

Security

Public Cloud in the Health & Social Care

Incompatible with some of your applications

Cloud is an 'Operating Model' requiring application re-platforming

Hybrid required

Network latency may require On Prem

Incompatibles costs

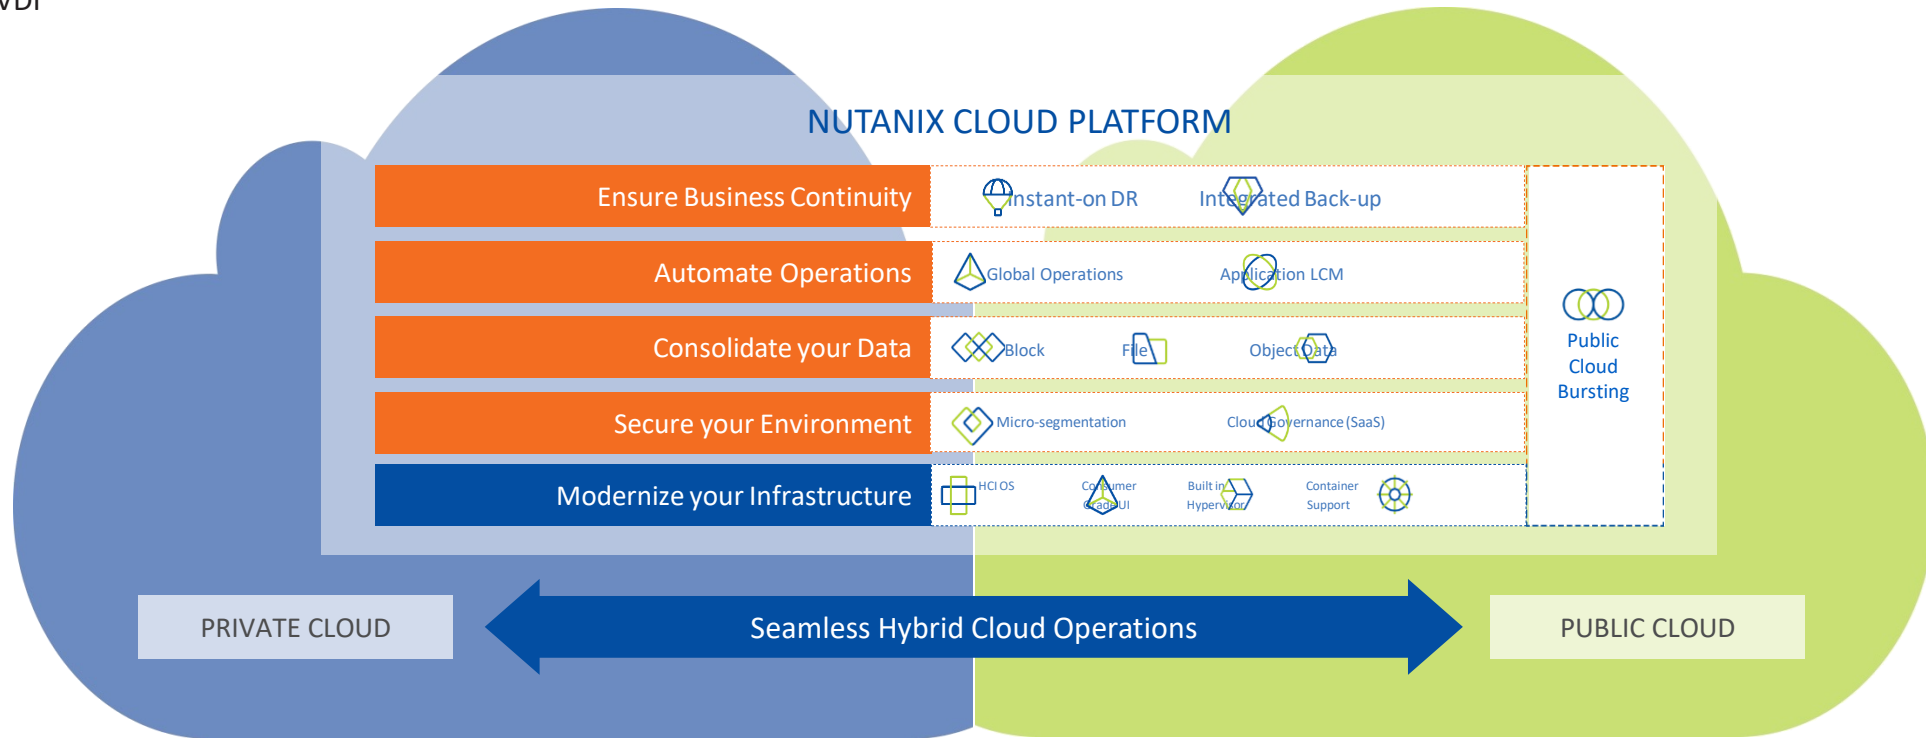

24x7 & long term archiving can be prohibitive

Customer lock-in

Reversibility / Cost to exit

Hybrid Cloud as an Operating Model

Thank You
