

It's complex...
isn't it?

David Price
Account Director, Public Sector

rackspace
technology.

**Solving
Together™**

We have all been on many journeys...

Joined RXT in Dec 2021

I was UKCloud's
Brand Director
for Health

VERITAS™

Head of Healthcare

Insight.

Head of Healthcare
& Head of Central Government

COMMVault

Head of Public Sector
for UK&I

Co-Founder & Head of
GSI Branch

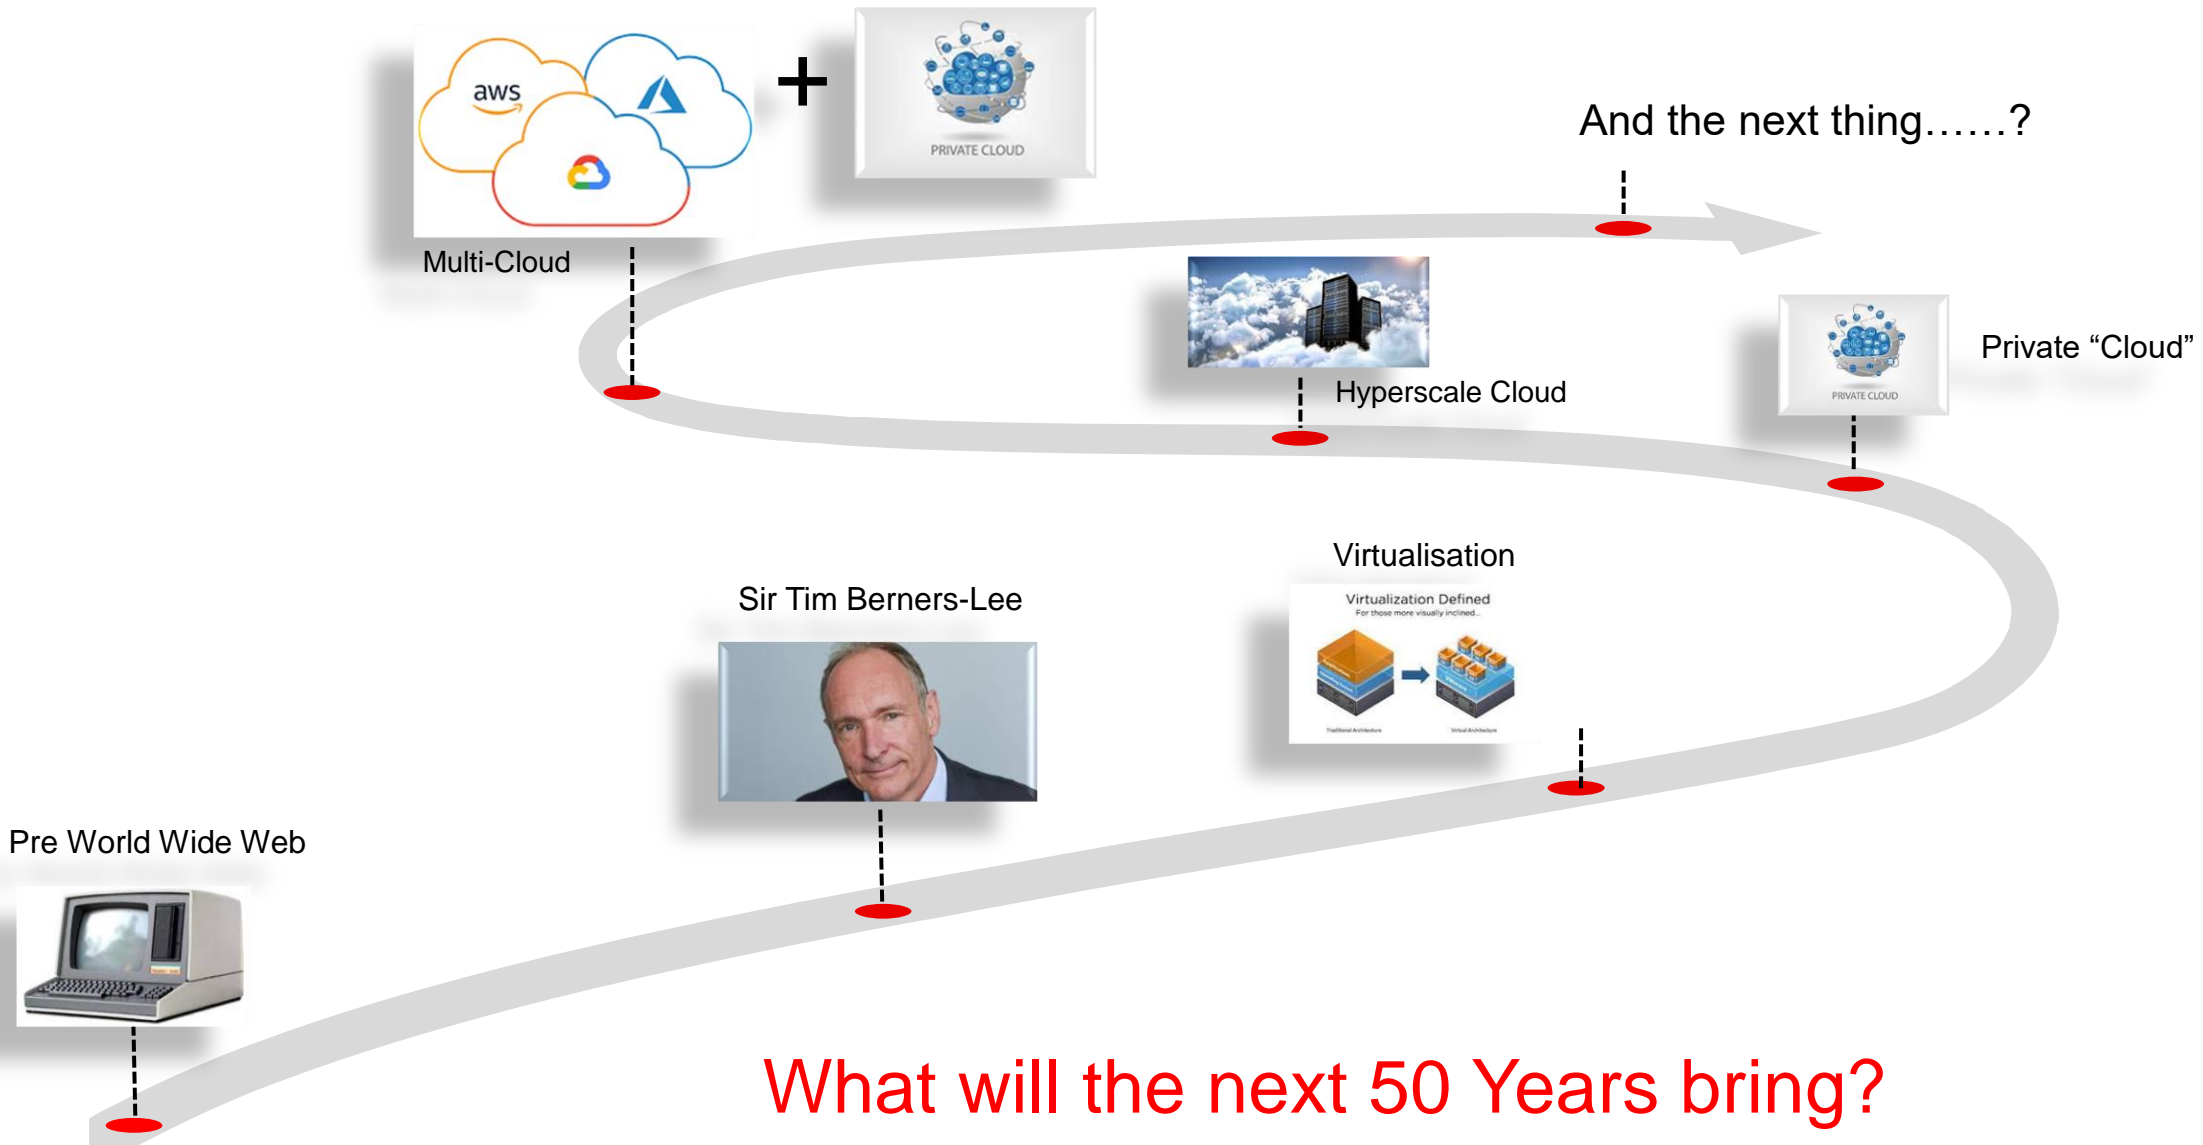

My First proper Dev
Role 1991

A Royal Naval
Marine Engineer –
'84 - 90

And we all need to keep up with the pace of change...

What will the next 50 Years bring?

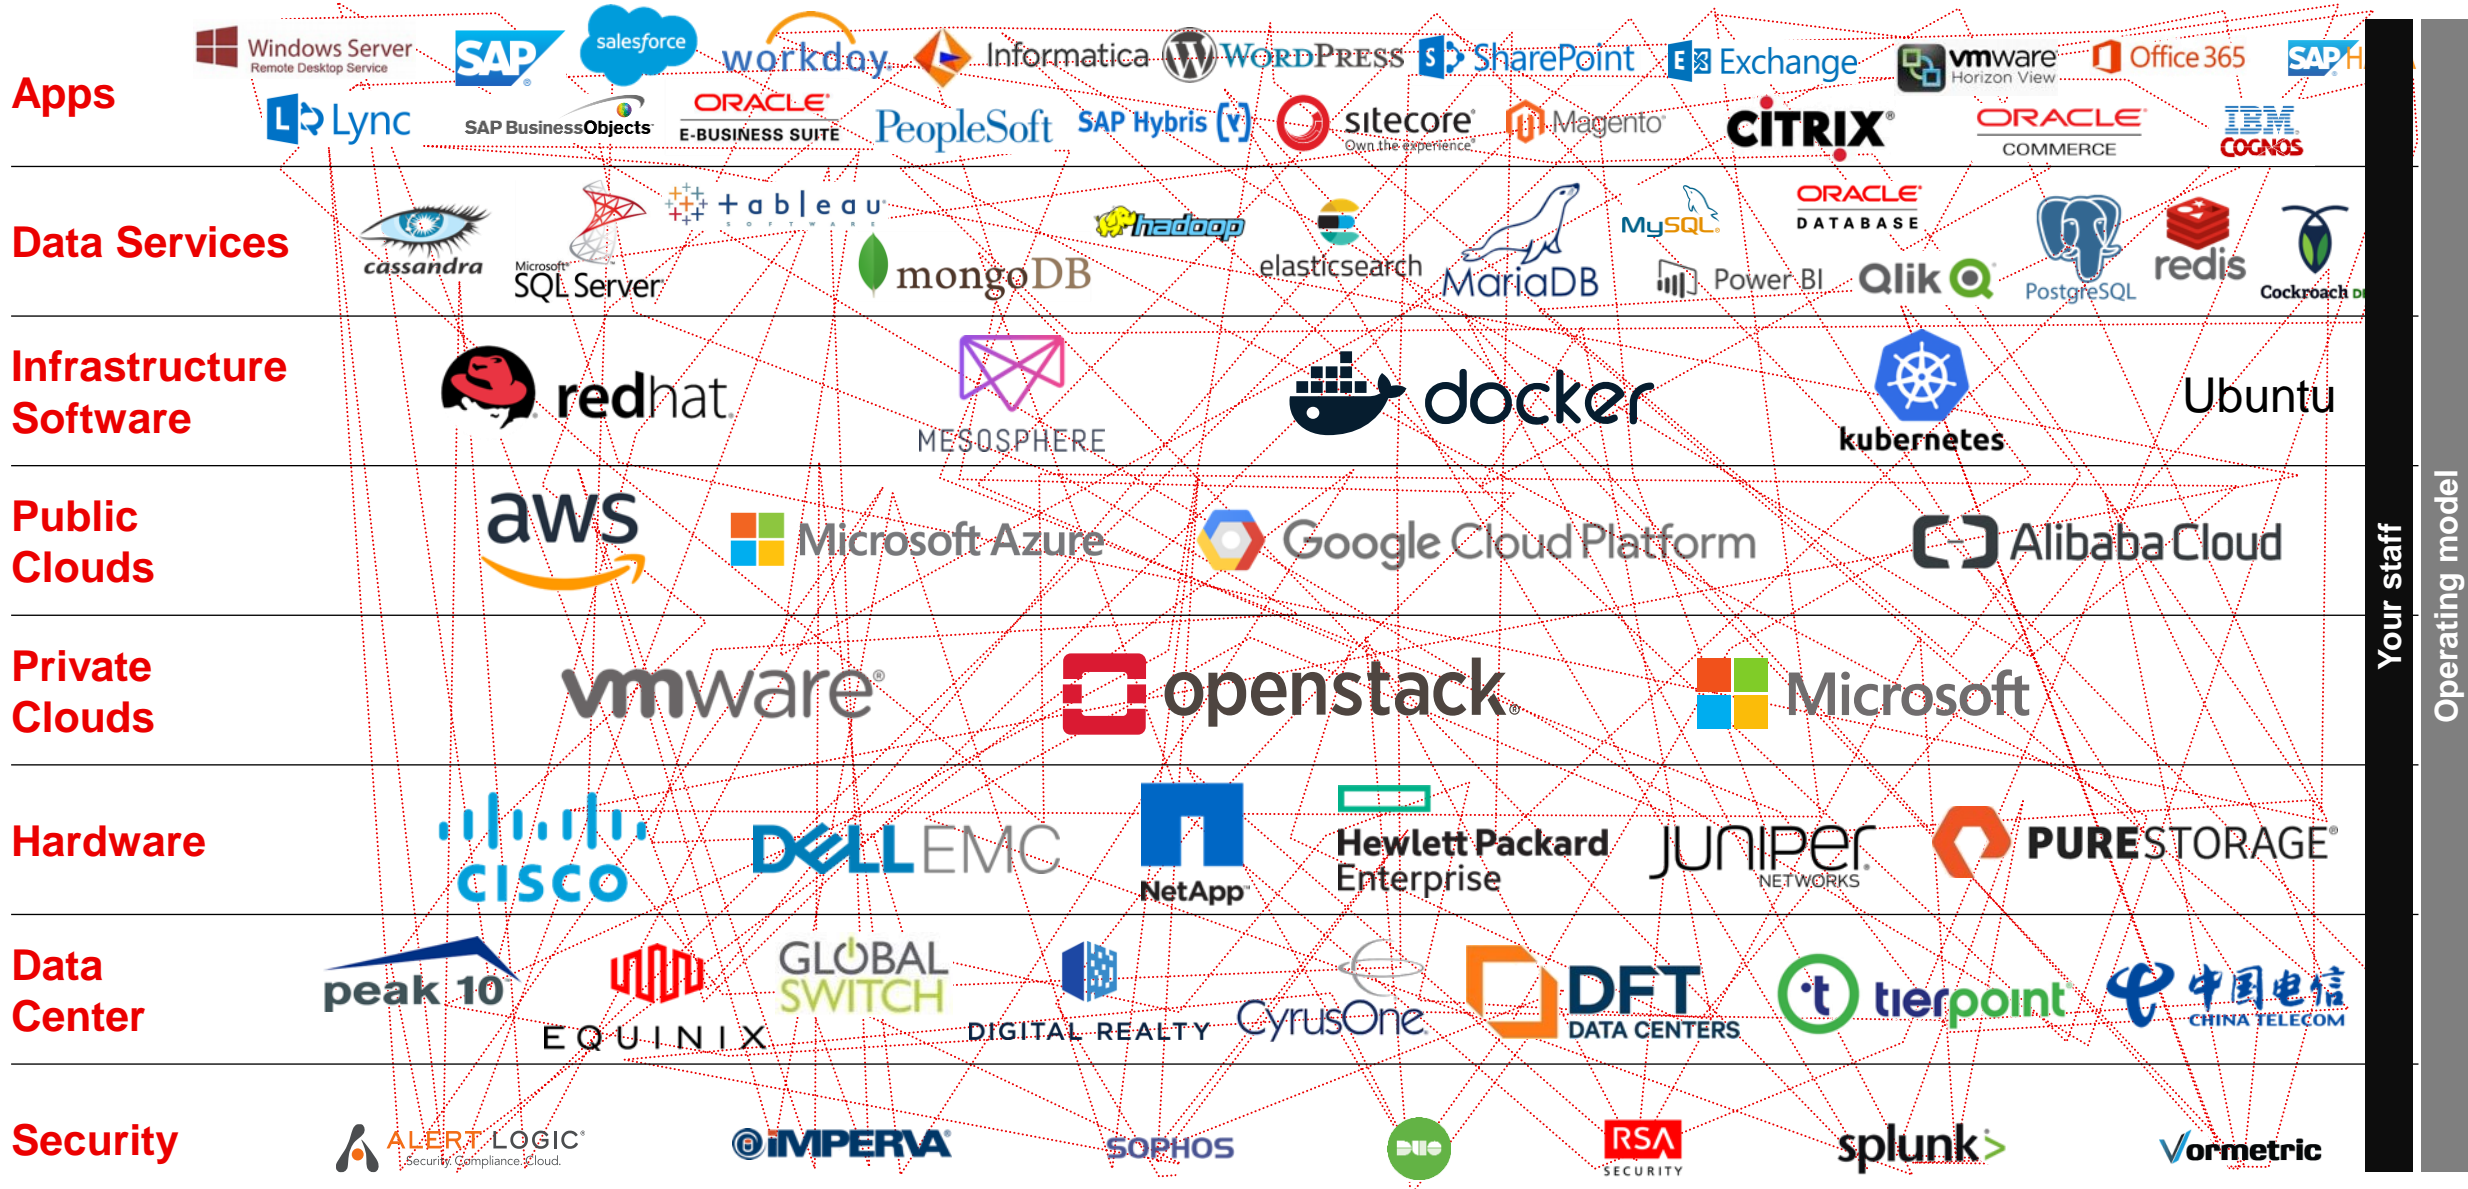

Why is Cloud an enabler?

“I want my Team to work “on” IT..... NOT in it”

These Journeys bring you to here.... or something like it...

Demands on organisations

Seismic shifts due to external events such as COVID-19

Customers expect a superior experience

New ways of working

Competitors are innovating at speed

Organic & inorganic growth

Accelerating the delivery of products & services

Optimising economics

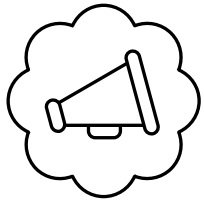

Fortifying security & addressing compliance

Your transformation journey is unique.
Each organisation has its own challenges and opportunities.

Cloud is changing the way Public Sector Organisations interact with IT

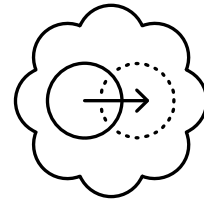

Most discussed cloud benefits

- Removes physical constraints
- Provides up-the-stack building blocks
- Delivers scale & reliability
- Enables tighter more controlled security stance
- Available on demand

Wider opportunity enabled by the cloud

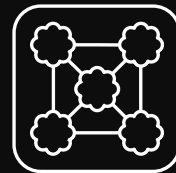

- Build new operating models
- Respond more quickly to operational needs
- Innovate & build faster (COVID validated this)
- Increase efficiency
- Enhance security & performance

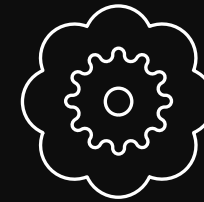

#1

Public clouds collectively considered leading source for tech innovation

80%+

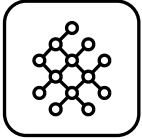

Cloud users using 2 or more clouds

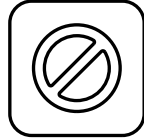

55%

New applications expected to be cloud native

Challenges beyond technology

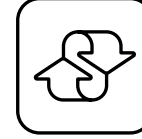

Running your own data centre?

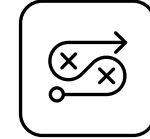

Challenged operational processes

Complex legacy applications

Ever more complex change management

Avoiding pitfalls

Operating models not supported by the cloud

Internal resistance

Lack of experienced people

Alignment to organisational needs

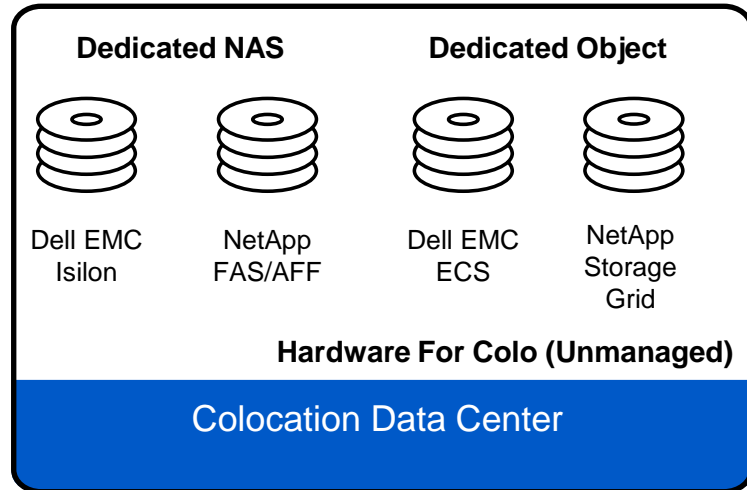

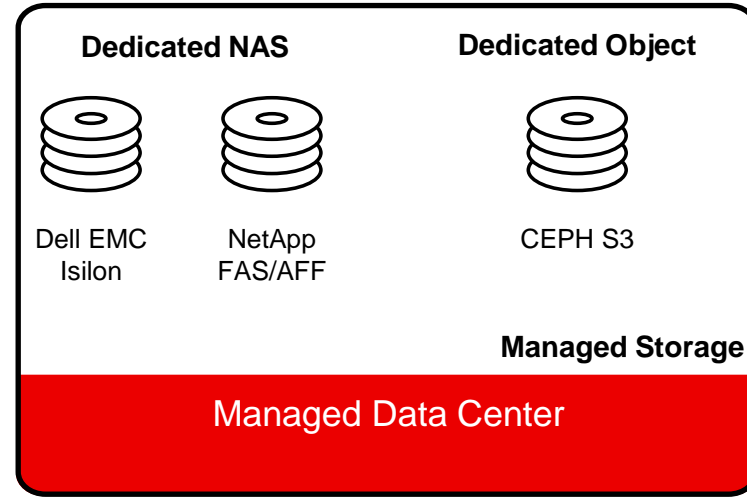

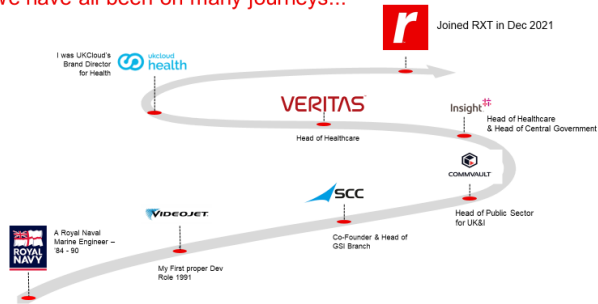

Delivering value

Your Data + Public Cloud = Huge Opex Bills?

We are often told that Data is the new “Oil” or “Soil”

We have all been on many journeys...

We all have a long way to go....

I have met many of these

Google Cloud

vmware®

Microsoft ICS HLD

Situation

ICS organisations across Health & Social Care

ICS View:

- ~20 organisations
- Multiple tenants / organisations
- Multiple Datacentre / application infrastructures
- Head of ICS Digital Strategy

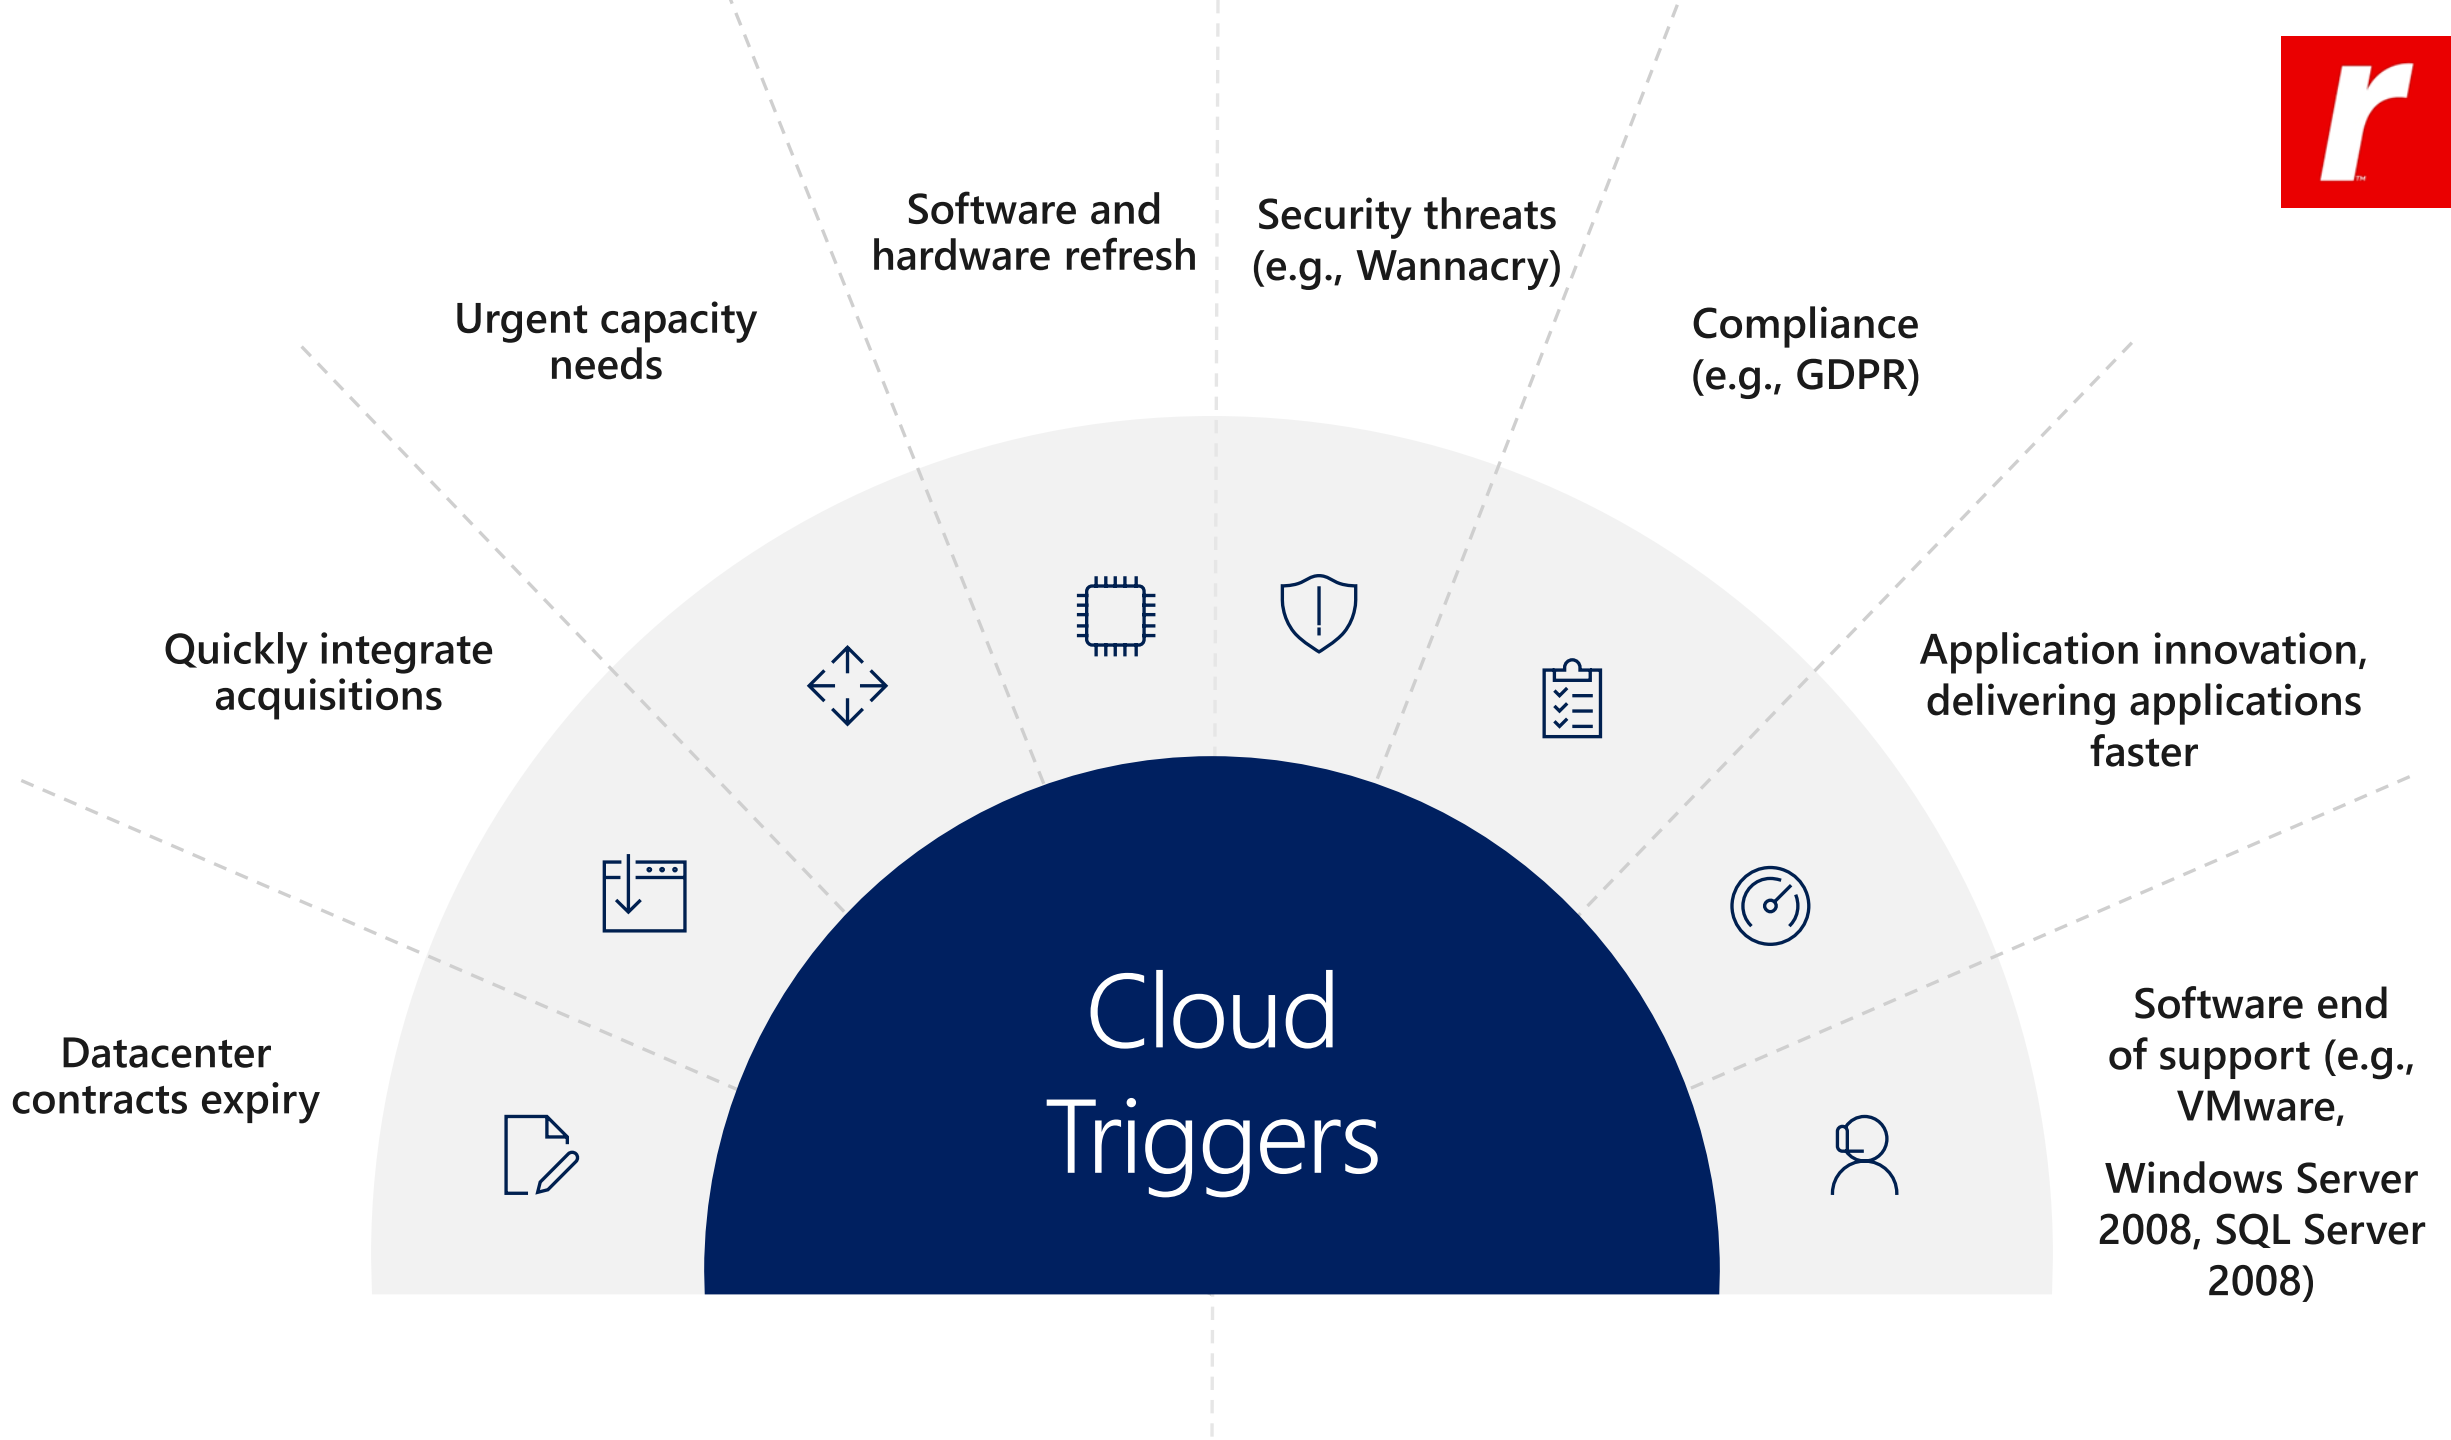

IT Strategies to consider:

- Build New & Migrate
- Consolidation / Collaboration
- 5Rs of Migration
- Management of Identity, Security, Policy and Information Governance using Azure Lighthouse & Arc
- Connectivity for anyone/ anywhere access for an ICS regional workforce

Real Scenarios:

- Digital Pathology
- App modernisation
- Regional SoC and Compliance
- Migrate to Modernise with Azure VMware Solution
- Capitalise multiple workloads in Azure with Reserved Capacity
- ICS Datawarehouse/ Data repository/ Population Health Analytics
- Business Continuity & Disaster Recovery – malicious/ non-malicious

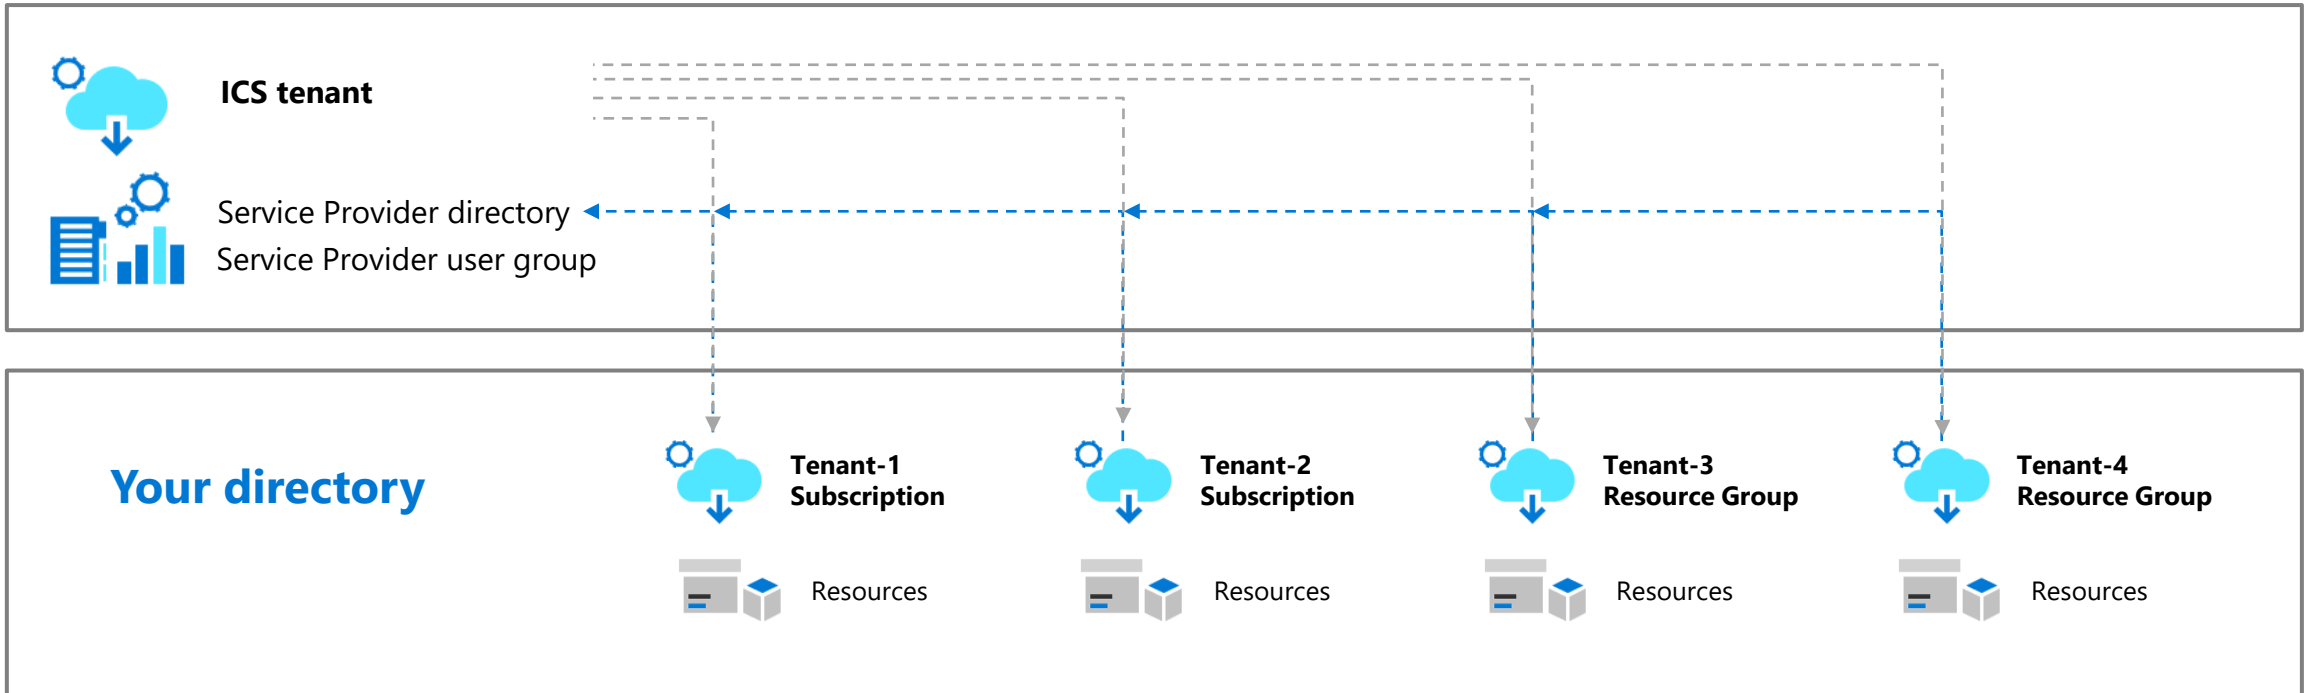

Azure Lighthouse

Enabling secure managed services for customers and their service providers

How it works: Azure delegated resource management

Securely delegate access to your service providers

Microsoft's end-to-end security

Integrate up to 40 categories

- Endpoint detection and response
- Endpoint protection platform
- Forensic tools
- Intrusion prevention system
- Threat vulnerability management
- Anti-phishing
- User and entity behavior analytics
- Threat intelligence feeds
- App and browser isolation
- Attachment sandboxing
- Application control
- End-user training
- Network firewall (URL detonation)
- Host firewall
- Secure email gateway
- Security assessment
- SIEM
- SOAR
- Cloud access security broker
- Cloud workload protection platform
- Cloud security posture management
- Incident response services
- DDOS protection
- IoT protection

- Data discovery
- Data classification
- Data loss prevention
- Insider risk management
- Database security
- Information and messaging encryption
- Device encryption
- Encrypted cloud storage
- Secrets management

- Identity governance
- Active directory
- Mobile application management
- Mobile device management

Microsoft

+

A perfect combination

Thank You
